SecurBand® Separation Instructions

Please follow these instructions to ensure proper separation
of individual wristbands from the sheet.

YES

How to Properly Separate SecurBand® Wristbands

Please follow these instructions to ensure proper separation of individual wristbands from the sheet.

1. Hold the sheet firmly with one hand, and starting from the adhesive, gently separate the band, pulling horizontally
2. Separate the band 1/3 of the way
3. Holding the middle part of the band, pull the band to the side
4. Separate the band 2/3 of the way
5. Repeat the process, holding the band from the bottom and pull horizontally
6. Separate the entire band from the sheet

Important: Don't try to separate the band in a single pull and don't pull to the front or back of the band as this may result in undesired tearing.

NO
